JUNE ISSUE 1991:

**NEXT MEETING:**

Tuesday 11th June 1991  
Lutheran Church Hall, Windsong Crt, Morphett Vale  
Benching of plants to be completed by 7.45pm  
for judging.  
Meeting begins at 8.00pm.

**GUEST SPEAKER:**

Mr Peter McCauley will present a talk on  
Miscellaneous Genera.  
Peter has been growing orchids since 1976. His main  
interest is in paphiopedilums but his collection  
includes cymbidiums, phalaenopsis, cattleyas etc.

**SUPPER:**

Mrs Trix Anderson will be in charge. Please remember  
to bring your contribution.

**HALL SET-UP:**

Would all willing to assist please arrive by 7pm.

**DAY-TIME CHAPTER:**

2pm. Thursday 13th June 1991, South Brighton  
Community Hall, Dover Square Reserve, Broadway,  
South Brighton.  
Mr J. Z. Weber of the State Herbarium Botanic  
Gardens will speak about the 'Orchids of South  
Australia'. Mr Weber is co-author of a book so  
titled and published in December of 1990.  
This is a most interesting subject and it is hoped  
that all members will make an effort to be present.

**TRADING TABLE:**

Mr. Dennis Daykin will be in charge.

## COMMITTEE MEETING:

Tuesday 18th June 1991, 7.30pm at the South Brighton Community Hall.

## DAY-TIME CHAPTER

Kath Harris  
Unfortunately sickness caught up with some of our regulars this week - you were all missed and hope to see you fit and well at our next meeting.

Peter McCauley gave a most interesting talk on Paphiopedilums. His slides and the books he showed us, together with his clear explanations should make them very easy to grow. Once again the many varieties shown inspires us to at least have a try to add another genera to our collection. Thanks, Peter, it is interesting to hear about an orchid so different to our Cymbidiums.

Keith Northcote won all the prizes for the popular vote - Keith always has something good to bring to our meetings, congratulations. Strange how the popular vote rarely agrees with the expert judges choice, choosing the spectacular orchid with perhaps not such good shape and colour. Congratulations Keith you were the winner of both.

John Nicholls supplied the plants for the raffle. A special thanks John, I won today. These prizes always get more attention mainly because we are looking for something different and are very much appreciated.

## JUDGES ROSTER

Keith Northcote  
Leaders

Open Div.	R. Pankoke
First Div	T. Tormet
Second Div	H. Lawson

Please advise K. Northcote if unavailable.

Meet at judges' table no later than 7.50pm.

South Coast judges to set up benches by 7.30pm & assist leaders.

## AUTUMN SHOW 1991 Keith Northcote

The show was a colourful event exhibiting a full range of expected genera and enjoyed by all members many of whom had benched a number of plants each. The plants were in good condition with several outstanding specimens, although the general flowering was perhaps a little below average in quality. Never the less it proved to be a most worthy show with a fine plant of Cym. Morialta 'Morialta Falls', grown by T. & M. Richardson, 1st Division, selected as Grand Champion of the Show. C. Chocolate Drop 'Kodama' grown by R. Moore, Open Division, was judged as Reserve Champion.

Cym. Morialta comes from a crossing of Cym. floribundum (formally pumilum) and Cym. Radak (Claudette x Pearl) registered by R.E. & M. Burns in 1985. The cultivar 'Morialta Falls' has established itself as a reliable miniature Cymbidium capable of winning on the show bench- as in the present situation. The only serious problem is that the lovely pendulous spikes with their large number of flowers make it difficult to transport the plant without damage. Cym. Morialta grows easily and well under the usual growing conditions used for Cymbidiums in the Adelaide region.

## PHOTOGRAPHER

Anyone who is willing to act as Club Photographer at our Meetings and Shows is asked to see the Treasurer, Mark Thompson at the next meeting. Mark has been doing this job for us lately but as his camera is now not up to the task another photographer is urgently required please.

## THANKS FOLKS

Thank you Rosalie Moore, Terry & Dot Howard, Ray Goodall and Barry Nurse who did the setting up for us at the Autumn Show.

## NAME BADGES

Are we going to have a Lucky Name Badge wearer at our next meeting ? Someone was lucky last month it could be you next time.

## IMPORTANT NOTICE

From the Dept. of Agriculture S.A. Plant Services Division.

In 1980 live green snail (*Helix Aperta*) were discovered in the Perth area; the first time this voracious snail which attacks vegetables, cereals, ornamentals and native plants was found in Australia. An eradication campaign funded by the Commonwealth and States was implemented but by 1988 it was found that eradication was not possible. The eradication campaign ceased on 30 June 1990 , but the W.A. Government has continued with a control program. As a consequence there is an increased likelihood of produce contaminated with snails being exported from the Perth area.

Since the green snail feeds on a wide range of plants and can produce a large number of eggs in a year restrictions have been placed on the importation of plant nursery stock, leafy vegetables and pasture fodder from W.A. into S.A.

Since all infestations of green Snail are well within a 55 km radius of Perth, plant nursery stock imports from this zone into S.A. must be accompanied by a certificate from the W.A. Department of Agriculture which certifies that the plant nursery stock has been produced from a plant nursery complying with the following conditions:

1. plants produced in an accredited nursery of the Nursery Hygiene Accreditation System of the Nursery Industry Association of W.A. (Inc) as described in 1990.

2. the accredited nursery is at least 2km from known green snail infestation.

3. baiting of the nursery with an effective molluscocide is carried out.

Plant nursery stock produced outside the 55 km zone can enter S.A. provided it is accompanied by a W.A. Department of Agriculture certificate certifying that such plants have been grown and packed in an area outside of the 55km radius of Perth.

People requiring further information please contact the Dept. of Agriculture S.A. Plant Services Division.

**THIS IS NOT SCIENCE FICTION. IF YOU DO NOT WANT ANOTHER LITTLE NASTY GOBBLING UP YOUR ORCHID COLLECTION PLEASE KEEP THE ABOVE IN MIND.**

## SPEAKERS

Earlier in the year a Speakers program was published in the gazette. Further to this I have news from our August Speaker, Mr D. Bloomfield from New South Wales. Darcy tells me that the crux of his talk will involve Orchids in flask and the method of deflasking and planting out of the plantlets and growing them on, using new products and the method of adapting their usages for successful growing. He also intends to auction one of his peanuts, proceeds of which will go to the Club. Sounds like an interesting evening.

## IN THE CATT-HOUSE

By Tom

Well all those pre-winter jobs should now be completed and its time to relax - or is it!. It seems that there is always something to do. A wander around my house today brought to light a number of plants that need staking up to stop them sprawling all over the place. Snails and slugs also need to be kept under tight control at this time of the year. Watering can now be reduced but a careful eye should be kept on young plants in small pots to ensure that they do not dehydrate.

## AUTUMN SHOW 1991
