### PUBLISHED MONTHLY

ISSUE NO 9

OCTOBER 1984

#### NEXT MEETING

The next cultural meeting will be held at the Lutheran Church Hall, Windsong Court, Christies Downs on

TUESDAY 9 OCTOBER at 8 p m.

#### PROGRAMME

Bob Nicolle will address the Club on his visit to Europe last March and his talk will be supported with slides. Some mebers have seen this programme elsewhere and you are assured of a very interesting evening.

#### SUPPER AT MONTHLY MEETINGS.

Over a cuppa and a nibble the members can indulge in fruitful conversation but this is only possible if the members bring along something to nibble. It has been noted of late that the number of 'plates' are diminishing so will you please do your bit by supporting the supper with a plate.

#### JUDGING OF PLANTS AT MONTHLY MEETINGS OF ORCHID CLUB OF GREAT BRITAIN

It is interesting to note that the above Club judges the plants in the following manner:-

'The Societies rules for judging place 50% appraisal on the condition of the plants, including difficulty of cultivation, 25% on number size and texture of blooms and 25% on colour and attractiveness of blooms.'

The manner is obviously related to the climate of the country where now grown (Great Britain) and the ability of the grower to adjust to the climate where the plants grow naturally.

# CULTURAL TIPS WITH STEPHEN MONKHOUSE

October is potting time for Cymbidiums. The major jobs are:-

- Prepare your growing area.
  - If plants are grown on mesh benchesall that is required is for the ground to be raked out removing old leaves and weeds. Due to the heavy rains there still seems to be weeds germinating. Spray the area with a suitable weed killer to eradicate the remaining weeds and to stop more germinating. (For best results this should be done on a fine day). The area should be left clear for approximately one week so that if you have used Vorax AA which is very good, the gasses that it expels  $c_an$  disperse with no ill effect to your plants. Your area preparation is now complete.
- All plants should have flower spikes removed if they have been in flower for 4-6 weeks. Do not allow the flowers to die on the plant. Potting on is quite simple requiring only the removal of the existing pot and provided the roots arehealthy, placing the plant in a larger pot with new potting mixture around the edges. Just prior to completion of potting a descertspoon of hoof and horn or blood and bone can be spread evenly around the pot. if you are using UVC mixture. The last step is to cover the fertilizer with more potting mixture leaving it level with the top of the pot

How do you know when your plant needs dividing?

An easy way to tell is if the centre of the plant is full of back bulbs (these are bulbs with without leaves) and the edges are surrounded with green bulbs. When dividing try to keep 2-3 green bulbs together so that each division could flower the next season. Back bulbs should be separated, the roots renoved and then placed in a pot or flat. During dividing time, labelling is very important, so make sure that all divisions and back bulbs are clearly labelled. Potting of divisions should follow the same procedure as I have suggested above.

If you have any questions on this subject contact me C/- Adelaide Orchids and I will answer them next month - others may have the same question.

# AUSTRALIAN NATIVE DENDROBIUMS WITH REG SHOOTER.

Repotting is done when flowering has finished. Now is the time to make sure you have all the materials necessary for the job. Obtain the pots, ensure that you have sufficient bark etc for compost. It is not too early to start preparing the compost by making up your mix according to your own formula. If you do not have one then 80% bark with 20% charcoal is a good basic mix for Australian epithytes. Sift this mixture through 1 inch sieve to remove all dust and very small components. Place the sifted mixture in a container of rainwater for 3 or 4 days until the bark is thoroughly soaked drain well then place in plastic bags to mature. If dry compost is used to pot orchids without first conditioning it by soaking, then no amount of watering will dampen the mixture and the plant will suffer.

# CHRISTMAS DINNER 24 NOVEMBER 1984 MORPHETT VALE HOTEL

The Committee have arranged for a three (3) course meal at a cost of \$14 a head and members desiring to attend are requested to make a firm commitment by paying in full at either the OCTOBER or NOVEMBER meetings. The meal is scheduled to commence at 7 P M.

#### 9TH AUSTRALIAN ORCHID CONFERENCE.

Special thanks are recorded to Trish and Dean Mills and Oley and Kym Trus for arranging the Club exhibit in Melbourne. Also to Lois Hansen for contribution in paking blooms. Our display was first class and much admired. Congratulations to Harry Lambert for securing an A D for his Cym Rangitara 'Brown Eye'.
