NOVEMBER ISSUE 1993

NEXT MEETING:

Tuesday 9th November 1993
Lutheran Church Hall, Windsong Crt, Christie Downs.
Benching of plants to be completed by 7.45pm
for judging.
Meeting commences at 8.00pm.

GUEST SPEAKER:

We are honored to have Mr Peter Bennett addressing the meeting. Mr Bennett is renowned as a teacher of Organic Gardening and if you haven't a compost bin before this meeting you'll feel quite guilty before the night is out.

SUPPER:

Mrs. Lisa Larsen will be in charge.

HALL SET-UP:

Would all willing to assist please arrive by 7pm.

DAYTIME CHAPTER:

2pm. Thursday 11th November 1993 at South Brighton Community Hall, Dover Square Reserve, Broadway, South Brighton. Due to ill health Mrs Robyn Monkhouse was unable to speak at our October Meeting so she will now be with us for our November Meeting. Her subject will be 'Orchids, a woman's viewpoint'.

TRADING TABLE:

Mr Dennis Daykin will be in charge.

COMMITTEE MEETING:

Tuesday 16th November 1993 at the South Brighton Community

DAYTIME CHAPTER by Ruth Clark

An eyecatching display of orchids greeted members on arrival at the October Daytime Meeting. Keith Northcote's welcome included a special welcome to two new comers, Lloyd Cox and Bill Tretaskis and to Ray Goodall's first daytime visit. An apology was received from John Illman and a 'get-well soon' wish sent to Robyn Monkhouse who was unable to come and speak. However, Stephen deputized for her choosing 'Zygopetalums' as his topic.

The recent exhibitions had been most successful and seen by many folk who would not normally see an Orchid Show.

The raffle orchids included zygopetalums from Adelaide Orchids and miscellaneous plants from Guest Orchids.

Stephen has dubbed the zygos 'The Lady Bird Orchids' and they grow quite happily along with the cymbidiums. The growth pattern is also similar except the flower spike comes from the new growth, which means that on young plants flowering is much quicker. Potting medium and fertilization is also as for cymbidiums. Plants should be kept moist but protected from winter rain which can cause black spot on the leaves. Colours are purple, chocolate and green with newer hybrids into the yellow/orange range. The flowers are highly perfumed. Growers are aiming for shorter spikes which will make the plant more compact and suitable for table decoration. Slides showed flower develop over the years with some newer plants having multiple flower spikes and more flowers. Some can flower two or even three times a year.

Stephen's choice from the display bench was Helen Edwards Slc. Mine Gold while members voted for her

Phalaenopsis, Little Mary followed by Berna and Harry Viney's Cymbidium Hubert Cambourne with equal third to Viney's C. Trick or Treat and Helen's C. Penny Kuroda x *intermedia*.

Helen provided a special cake for afternoon tea to celebrate the 6th birthday of the Daytime Chapter. After Keith 'did the honours' this was enjoyed by all with their cuppa.

NEW MEMBERS

We would like to extend a warm welcome to Lloyd Cox of Brighton and Roger Kidd of Christies Beach.

Good Orchid Growing.

IN MEMORIAM

We would like to thank all those Members who rang, and those who spoke personally, with words of condolence, at the passing of my Father.

It was good to know there were friends who cared in our time of grief.

Peter and Geraldine Flavel.

LIBRARY

Would members with library books in their possession please return the books to the Club at the November meeting so that the annual stocktake can be completed.

STOCKTAKE

Any Members who are holding Club Property please advise the Treasurer, Dale, in writing, by the December Meeting. Please note, this includes documents, books or articles.

CHRISTMAS LUNCHEON

Members who intend to go to the Christmas Luncheon please pay the balance due (\$10) at the November meeting.

RAFFLE PLANTS

Raffle plants for the October meeting came from Guest Orchids. Raffle plants for the November meeting will be a miscellaneous selection from Mt. Beenak.

OLD CLARENDON WINERY

Thank you to the members, including one very new member, who spent considerable time helping make the Exhibition a success.

Many visitors commented on the beauty of the displays and the variety of genera.

SARCOCHILUS by R. MOORE

The beautiful *Sarcochilus* have recently been in flower. *Sarcochilus falcatus* was first collected in 1802-3 by Robert Brown and taken back to England. These original specimens can still be found in the British Museum.

Sarco. falcatus is commonly

known as the Orange Blossum Orchid. In Victoria, New South Wales and Queensland it is found growing on trees, treeferns or by banks of streams or soakages, often in gullies or ravines, where there is always shade.

The flowers are white/cream with yellow markings on the labellum and also a mauve tip on the distal end.

The number of flowers on a raceme can be three to six, with large, well grown, plants producing 4 or more spikes from each growth.

This orchid grows epiphytically and the root system must be kept moist or well watered in the hot weather. The leaves are not glossy, even on the healthiest plants, and dehydration is often apparent and the leaves shrivelled. Root systems are not extensive when grown in cultivation but in nature can reach 3 to 5 metres long.

Sarco. falcatus is considered hard to keep growing in pot culture.

falcatus has been used in hybridizing and the progeny we often see on the show benches is *Sarco. Melba* which is *Sarco. falcatus* crossed with *Sarco. hartmannii*.

OCTOBER MONTHLY COMPETITION

FLOWER OF THE MONTH

LYCASTE BETTY KOOL 'SNOW QUEEN' grown by TOM AND MARY RICHARDSON.
