

The South Coast Orchid Club of SA Inc.

# Gazette

June  
2014

**PRESIDENT: Geoff Spear**

**PATRON: Sydney Monkhouse**

## AT A GLANCE

The next meeting of the South Coast Orchid Club will be held at 8 pm on Wednesday 4th June 2014 at St. Bernadette's Church Hall corner of Walsh Avenue and South Road, St. Marys. Our interstate guest speaker will be Steve Stebbings whose subject will be Attaching Orchids to Mounts. Steve will have plants for sale.

**BEGINNERS' GROUP:** 7.20 pm. Co-ordinator Daniel Lutz. Please write any questions about orchids and leave in box on table near Secretary's desk. One question will be answered by President, Geoff Spear. The rest will be answered at Beginners' Class at the following meeting.

### DAYTIME CHAPTER

The next meeting will be held at Lou Kesting Hall, off Broadway, South Brighton on Thursday 12th June 2014 at 2 pm. Our guest speaker will be Neil and Vicky Cooper talking about collectable glass.

### SOUTHERN REGION GROUP

The next meeting will be held at 2 pm. on Sunday 15<sup>th</sup> June 2014 in Carrickalinga House, 17-19 Torrens Street, Victor Harbor. Guest speaker Ron Yates will speak on Intergeneric Oncidinae.

### S.A.R.O.C. FAIR 7<sup>th</sup> JUNE

**Venue:** The Drill Hall, Torrens Parade Ground, King William Road, Adelaide at the rear of Government House. Free parking on the Parade Ground.

#### **Friday 6<sup>th</sup> June:**

Hall opens 10.00 am. to set up area for displays etc. 12 to 12.30 put in display plants.

**Display:** To be completed by 5.00 pm.

**Judging:** 6.00 pm. If you have a plant worthy of an award, please notify Roger Rankin by 2nd June.

#### **Saturday 7<sup>th</sup> June:**

Hall open 9.00 am. to 5.00 pm.

Dinner at Oakden Centre, cnr. Fosters Road and Hilltop Drive, Oakden commencing at 6.30 pm. Pay on the night. Ring Lucy to book a table on 83814420. This is an exciting night. Members let's organise a group of South Coast people to attend.

#### **Sunday 8<sup>th</sup> June:**

Hall open 9.00 am. to 4.00 pm.

### BIRTHDAY CONGRATULATIONS – JUNE

Jan Saxon, Henk van Leuveren, Daniel Spear, Jenny Ciplis, Judy McRedmond, Alan Myren.

**NEW MEMBER:** Welcome to new member Reg Foster.

**JUDGING ROSTER 4/06/2014** from *Sue Zerbe*, Registrar of Judges

**OPEN & SECOND DIVISION: Leader** – N. Oliver, J. McRedmond **Recorder:** G. Zerbe.

**FIRST DIVISION: Leader** – J. Gay, P. Haltis **Recorder:** V. Cooper.

## **AOC President's Newsletter**

When I took over as AOC President, it was my aim to cut expenses as much as possible without impacting on orchid clubs if at all possible. For at least the last 4 years the income of the AOC has decreased considerably; personal memberships/subscriptions to 'Orchids Australia' in Australia have decreased by 15% between 2010/11 and 2012/13 (the year 2013/14 is not complete, so cannot be compared), magazine advertising income is down by 36%, and bank interest by 27%. Thankfully the number of AOC Group Members has been fairly static at around 140 clubs, although there are quite a large number of orchid clubs in Australia which are not Group Members. Unfortunately over the past few years nobody has been prepared to address this situation apart from pulling more out of the reserve funds. Over \$10,000 has been taken out of reserve funds in the last 5 years, and all of this has been used. If this continues, it will draw this fund down to an untenable position. The AOC is not bankrupt by any means, but now is the time when I believe we have to take stock and take some drastic measures.

'Orchids Australia' should be paying for itself, but unfortunately this has not been the case for some time, so the Council cannot keep propping this up. Currently the AOC is losing over \$14 per subscription annually. Increased postage and printing costs have been two of the major components that are causing concerns. The question may be asked: "Should the AOC continue to print 'Orchids Australia'?", but we must bear in mind that the AOC publication not only has subscribers in Australia but overseas as well, and is classed as one of the better orchid publications worldwide. It is also a major means of communication between the AOC, personal and AOC Group Members. We are looking for cheaper ways of producing the magazine, but it is not easy. It would help if you encouraged your club members to subscribe to 'Orchids Australia', as printing charges per magazine are reduced as the number of magazines printed are increased.

Some costs have been cut dramatically – non-magazine postage has been cut considerably with most communication from me by email at no cost to the AOC, and the AGM costs have also been cut by using a cheaper venue. One big expense that has to be looked at is travelling costs to AOC meetings (both AGM and Judges' & Awards Standing Committee meetings). If they don't already do it, Delegates should try to get the cheapest airfare possible by booking as soon as they know the date of the meeting. The 2014 AGM, all being well, will cost almost nothing, as we plan to use Skype for which costs will be absolutely minimal.

Some suggestions for improving finances are:

- 1) The AROs discuss with their member clubs the proposition to help fund the expenses for their Delegates to attend meetings.
- 2) A number of clubs have already had fundraising events for the AOC eg sausage sizzle at Bunnings, or just a straight donation and these are not large clubs (mostly country clubs)

As you are the owners of the Australian Orchid Council I am asking all clubs to discuss these and other ideas to pass on to your ARO and State Delegate.

**You are reminded that nomination for AOC Officers for 2015 and any motions that you wish to be discussed at the 2014 AGM or Board of Management Meeting need to be in the hands of the AOC Secretary, Thea Shaughnessy, by June 30<sup>th</sup> 2014.** These may be sent in the post to 88 Wehl St North, Mt Gambier, SA 5290, or by email to [jtsbaughnessy1@bigpond.com](mailto:jtsbaughnessy1@bigpond.com)

It is with sadness that I notify you of the sudden passing of Miss Pam Bartlett, a former AOC President, Vice President and Secretary, on May 6th.

Also Colin Jennings, Registrar General and Publications Director, has been seriously ill and it may be some time before he can fulfil all his duties promptly. I ask for your patience if you are waiting for him to do anything for you.

Yours in orchids,  
Jim Shaughnessy  
AOC President

**People who submit articles to the Club for inclusion in our Gazette express opinions which are not necessarily those of the Club.**

**No guarantee is provided to anyone using the ideas & opinions expressed in these articles. Items must be delivered to the Editor by the second Thursday of each month.**

**E. & O. E.**

**EDITOR: Rod McRedmond Ph 08 8293 3545**

### **PUBLIC LIABILITY**

Under insurance guidelines all members attending any function or meeting held by the Club must sign an attendance sheet.

## **PRESIDENT'S REPORT**

May proved to be a very busy time. It does not happen very often that a May meeting and Afternoon Group fall in the same week as the Show. Fun, but it adds to the pressure of an already a busy week.

Thank you to Committee and Members for all the assistance we received. You are all champions. Display plants and trading table plants were more plentiful than last year. Pasadena Shopping Centre was most impressed with our beautiful display and the amount of interest from customers.

**Congratulations to Grand Champion and Division Growers a great effort. You all need a pat on the back for giving such pleasure to everyone who came to see the display.**

Kevin Cattermole was our guest speaker, accompanied by his wife Roxanne. Kevin also spoke at the Daytime Chapter. Once again Kevin gave very interesting presentations. Kevin and Roxanne often come to Adelaide to look at the shows and both are excellent customers at the trading table. Thank you to both. Our monthly meeting had an excellent benching of orchids.

Friday the 30<sup>th</sup> May I have been invited to Bunnings at Noarlunga to give a potting demonstration.

Finally, but most importantly, at S.A.R.O.C. Fair. our orchid display will be completely different to other years. You will be impressed. Paul and Donja Hayes have designed this display. Please, we need your orchids to make this a magnificent display. Please see information on front page. We would also like helpers to transport Orchids etc.

Good Growing and Showing,  
Geoff.

## **DAYTIME CHAPTER**

Hi Everyone,

Now that the Autumn Show, Main Meeting and Daytime Chapter have all taken place (quite a busy week) I must knuckle down and do this short summary of our very interesting Daytime Meeting.

Our guest speaker, Mr Kevin Cattermole and his lovely wife Rosanne came all the way from Napperby (near Pt Pirie) to be guest speaker at both our Main Group and Afternoon Group Chapter. So thank you both so very much, for coming all this way to share your wealth of knowledge with us.

Kevin's talk at the Daytime Chapter was to inform us all about different ways of creating the right growing environment for our orchids, eg. humidity, location and also moving them around occasionally to find the right position to suit your particular environment. Everyone has different growing conditions. He also told of how the right watering methods could help control certain pests. All this was great to hear and hopefully will be put into action by us all. It's given us all food for thought anyway. A Power Point Presentation. was also shown of Kevin's particular watering systems.

There were a few plants and potted home made jams also available on our trading table. These were brought along by Kevin & Rosanne and were eagerly purchased by members.

Geraldine Flavel, with a little help from Kevin did a great job with our plant commentary. Thanks Geraldine.

Lance Davis grew the plant that was voted in best on the day. A lovely plant Cattleya "Singapore Welcome". A plant with lovely huge pale mauve flowers, an oldie but a goodie, Congratulations Lance & Barbara. Well done.

Apologies from Geoff and Lucy who are manning our trading table at Pasadena.

A big cheerio to the members not able to attend today. Take care all. We hope to see you all again very soon.

The meeting was closed after another great afternoon.

Thanking all in attendance,

Bye Dorothy  
Phone: 8277 1793

### **SOUTHERN REGION GROUP MEETING SUNDAY 18TH MAY 2014**

**Beginner's Group:** started at 1.30p.m. hosted by John Gay

The President opened the meeting at 2.00p.m. welcoming members. He spoke about the Autumn Show and thanked us for our plants and help on trading table. He congratulated Noel Oliver and Eileen Pinnock for their achievements at the show where Eileen received best of first division with her *Cymbidium dayanum*.

He then welcomed guest speaker Graham Zerbe who then gave his informative talk on 'How to prepare your plants for shows'.

The plants bought in for judging were a credit to the members.

Members were invited to attend the main meeting on 4th June to hear guest speaker Steve Stebbings talk on attaching orchids to mounts.

.Guest speaker next meeting on 15th June will be Ron Yates talking on Oncidiums.

**Apologies:** The Worthing Family and Krys Gilmore.

**New Members:** Daryl Jones was presented with his plant and name badge. Welcome Daryl.

**Judging:** Noel Oliver and John Gay.

**Plant of the Day and Popular vote:** *Paph. villosum* benched by Ruth Tugwell.

## May Plant Commentary

**Flower of Second Division and Flower of the Night:** *Oncidium uniflora* grown by Paul and Donja Hayes. This lovely species orchid had seven (7) inflorescences and sixteen (16) flowers. The petals were khaki green in colour with yellow skirts and a shield of light tan, grown on a cork base with tilandsia to help retain humidity around the plant. The plant was very clean and fresh. Congratulations Paul and Donja, your orchid certainly deserves its win tonight.

**Flower of Open Division:** *Laelia rubescens* grown by Richard and Beryl Wilson another great species orchid having two (2) inflorescences and seven (7) plus flowers grown on a cork base and tilandsia. These delicate white flowers, with a very pale mauve flush around the edges of the petals and boasting a lip with a dark purple at the back of the throat had a white and mauve pollen cup. This is a really a striking orchid. Thank you so much for bringing it in for us to see tonight.

## **May Plant Commentary (cont.)**

**Flower of First Division:** *LaelioCattleya* Angel Heart 'Hihimanu', grown by Rito and Rosetta Silvestri, had four (4) upright inflorescences with five (5) to seven (7) flowers. The Pale pink flowers had a flush of white and frilled lip of pale pink centered with a dark purple wedge and a blushed yellow centre with a white pollen cup with pink spots. Thank you Rito and Rosetta, now we all want one of these beautiful orchids.

**Seedling of the Night:** *Rhyncolaeliocattleya* Caricia En Paradise 'Cassie' was grown by Richard and Beryl Wilson. It had one (1) inflorescence with two (2) delightful flowers, white in colour with a spectacular lip, fluted with a purple wedge flowing up to a yellow flush and a white pollen cap.

**Popular Vote of the Night:** *Brassocattleya* Pastoral 'Innocence' was grown by Christine Robertson. This orchid had two (2) inflorescences with open flowers and one still to open. The flowers were quite unusual. The dorsal and the two lower sepals were plain sepals and the petals frilled, the lip being fluted all around a yellow centre with a white column and pollen cap.

## Autumn Show Champions List

### GRAND CHAMPION

Den. Burana Stripes 'WU' Peter & Geraldine Flavel (487)

Paph. (Olivia x Maudiae 'Gothic')	Rod & Judy McRedmond (1141)	3
-----------------------------------	-----------------------------	---

## Autumn Show Results List (cont.)

Points Awarded

### First Division (cont.)

#### **BEST PAPHIOPEDILUM**

Paph. (Olivia x Maudiae 'Gothic') Rod & Judy McRedmond (1141) 3

#### **Cymbidium - Species**

Cym. dayanum Eileen Pinnock (519) 3

#### **Zygopetalum - Hybrid**

Z. Titanic 'Monarch' & Oui Ju Michael Willoughby (1252) 3

Z. Redvale 'Jerb' & Oui Ju Michael Willoughby (1252) 2

#### **Zygopetalinae - Hybrid**

Hmwsa. Aussie Quest 'MW' & Oui Ju Michael Willoughby (1252) 3

#### **BEST Zygopetalinae**

Z. Titanic 'Monarch' & Oui Ju Michael Willoughby (1252) 3

#### **Cymbidium - Specimen**

Cym. Enzan Summer 'Ben' & Oui Ju Michael Willoughby (1252) 3

Cym. dayanum Eileen Pinnock (519) 2

### Second Division

#### **Australian Native epiphyte - Species**

Den. lithocola 'Mauve Shower' Rowan Crowhurst (763) 3

#### **Australian Native - Specimen**

Den. lithocola 'Mauve Shower' Rowan Crowhurst (763) 3

#### **BEST AUSTRALIAN NATIVE**

Den. lithocola 'Mauve Shower' Rowan Crowhurst (763) 3

#### **Cymbidium All Sizes and Colours**

Cym. Enzan Summer 'Gold Dust' Bill Jayne (1180) 3

#### **BEST CYMBIDIUM**

Cym. Enzan Summer 'Gold Dust' Bill Jayne (1180) 3

#### **Laeliinae - species**

B. nodosa Paul & Donja Hayes (1129) 3

#### **Laeliinae Cluster**

Lc. Blue Boy x C. harrissoniae Bill Jayne (1180) 3

C. Portiata 'Mel' Paul & Donja Hayes (1129) 2

#### **BEST LAELIINAE**

Lc. Blue Boy x C. harrissoniae Bill Jayne (1180) 3

#### **Oncidiinae - Species**

Gom. flexuosa Rowan Crowhurst (763) 3

Milt. clowesii Vicky & Neil Cooper (1119) 2

#### **Oncidiinae Hybrid > 60mm**

Pwp. Mariposa 'Green Valley Alba' Rowan Crowhurst (763) 3

Mtssa. Aztec 'Toni' Rowan Crowhurst (763) 2

#### **Oncidiinae Hybrid < 60mm**

Onc. Sweet Sugar Paul & Donja Hayes (1129) 3

#### **Oncidiinae - Specimen**

Onc. Sweet Sugar Paul & Donja Hayes (1129) 3

#### **BEST ONCIDIINAE**

Onc. Sweet Sugar Paul & Donja Hayes (1129) 3

#### **Zygopetalinae - Hybrid**

Zcx. Pimpala 'March 17th' Bill Jayne (1180) 3

#### **BEST Zygopetalinae**

Zcx. Pimpala 'March 17th' Bill Jayne (1180) 3

## Autumn Show Plant Commentary

### AUTUMN SHOW 4/05/14 to 10/05/14

The Judging of the Autumn Show took place on a cold 16°C day at the Hamilton School Basketball Stadium, we had 65 orchids to judge the number being down on recent years but the quality was of a really high standard, and the display was really eye-catching.

would like to take this opportunity to congratulate those members whose orchids were prize winners as well as all of the members who supported the show because without your support there would not be a show.

There was no denying that the Grand Champion was the stand out plant of the Show, a *Dendrobium* Burana Stripes 'WU' (below) grown by Peter and Geraldine Flavel. This orchid also gave Peter and Geraldine the Open Division Champion, and Champion of any other genus, not listed. Congratulations this standout orchid had 40 plus pale pink flowers finely pinstriped in a pinky/purple and the lip with a darker stripe, Peter and Geraldine you really had a very successful show.

Peter and Geraldine Flavel grew Champion Laeliinae with *Brassavola nodosa* also giving them Champion species, a deserving win for you both a stunning orchid.

Champion Specimen *Stenoglottis longifolia* (below) was grown by Geoff and Lucy Spear. Congratulations on a typically well grown specimen and an exceptional plant.

## **Autumn Show Plant Commentary (cont.)**

Champion Australian Native: *Dendrobium wassellii* 'Olly' (below) was grown by Noel Oliver this lovely mounted orchid boasted 8 plus inflorescences clean white flowers with a cream lip also gave Noel, The Bill Murdoch Trophy Nomination and the Les Nesbit Trophy Nomination (Species).

Champion Cymbidium: *Cymbidium dayanum* grown by Eileen Pinnock also gave Eileen the Champion First Division this orchid has 20 plus inflorescences evenly growing around the pot congratulations Eileen a really showy orchid.

Champion Paphiopedilum was won by Rod and Judy McRedmond with *Paphiopedilum* (Olivia x Maudiae) (below). Congratulations Rod and Judy a very tall inflorescence with a lovely surprise on top.

## **Autumn Show Plant Commentary (cont.)**

Champion Oncidiinae was *Oncidium* Sweet Sugar grown by Paul and Donja Hayes this orchid also gave them Second Division Champion a beautiful plant two inflorescence one with 70 flowers and the other had 60 plus buds yet to open, this is a magnificent plant just imagine what it would look like with all the buds open well done Paul and Donja this orchid is a real credit to you.

Champion Zygopetalinae was won by Bill Jayne with *Zygopabstia* Pimpala 'March 17<sup>th</sup>' the flowers petals are green and dappled markings of brown, the lip is white and purple veined with a blush of lighter purple well done a very nice clean plant.

Once the judging was completed and plants were transported to the Shopping Centre. The display assembled in the Pasadena Shopping Centre was a credit to the Club Members that participated, and of course to those who created the display. I believe from reports that it was a successful Autumn Show

*Sue Zerbe*  
Registrar of Judges

## Culture notes for June

June signals our official start to winter although the lead up to it was hardly what you would expect in late autumn with day after day in the mid 20's. Even the sun now still has a degree of heat to it well above what you expect 4 weeks out from the shortest days of year. So has this confused our orchids? Heck yeah. I have plants flowering now in mid May as I write these that normally grace the winter show bench in July. However, it is good to see some plants though sticking to their time table such as the natives.

June weather can be quite variable this month with a fair percentage of fine days in amongst the not so fine days. Looking at the longer term weather models has us on the verge of another warmer and drier winter. Great, 2 years in a row without apricots and cherries. Winter chilling has a great benefit to our fruit trees as it can do with orchids and if stays too warm both cannot be expected to produce their best.

If all goes to plan June can bring with it our first frosts with dry and still nights leading to its formation especially just after a very cold change. It has been awhile since we have had some really bad frosts for an extended period so we should be due rather soon. I still hear horror stories from Junes gone by where whole collections have suffered and took many years to recover. We live in harsh climate of extremes.

Fortunately in suburbia with the general heat that builds up with living close together keeps the nights a little warmer and the only frost is usually a light dusting on the lawn. The same cannot be said for those outside in the country where frosts can be more severe. There are a couple of ways to keep frost at bay. Keep air movement up if possible and wet the floor down at sunset to bump up the humidity can help. You could try and fill some large black containers with water and place them in and under the benches. They will absorb the heat during the day and radiate it back at night. Whilst it may only add 2 or 3 degrees to the internal temperature of your orchid house, that's all you need sometimes to offset any frost. Even spraying the plants with water before the frost settles can help.

As June wears on many early spring flowering plants will begin to break sheath. This applies to natives and cymbidiums in particular and now they need the protection from the elements. A small spot grows into a large spot and bud drop can range from one to all. Throw in a couple of slugs and snails and there goes this plants flowering for this year. It's no point neglecting them at this vital stage. I grow my plants for flowers and not snail food.

Flowering wise we start to see more cymbidiums grace the bench. The Zygopetalum group are still doing well as are the Laeliinae with *Laelia anceps* and the varieties of the same adding great colour to a collection. If you are flowering these as a beginner make sure the flowers are kept dry as soon as they show. Their buds are covered in a sugary secretion that attracts ants and mould if kept damp and they mark easily. Each bud has a protective sheath that should be removed before flowering and whilst holding sap, otherwise if they dry your presentation will have flowers facing all over the place, including upside down.

The larger flowered Cattleyas in the main are finished although there will be few hangers on, especially those with the winter flowering species *C. trianae* in the breeding but if you can, try and build a collection of the mini cat's. Smaller than the standard exhibition type, the influence of some of the smaller winter flowering species such as *C. coccinea* in the background will keep a reliable supply of flowers right thru winter and with the added bonus of flowering more than once a year. The variation between a winter flowering clone and summer flowering clone of the same plant is quite significant. Some do better in the cool and some do better in the warm. As long as you provide hard roof cover and let them dry out in between watering, they are quite easy to grow and take up little bench space.

For those that grow terrestrials June is our wettest month and damping off will become a problem if plants are kept too wet. I found this out after February rains rotted out several exhibition pots before they even showed above the surface. Ouch.

If you do lose a few this year maybe add some more sand to the mix next year to improve drainage. Coarse washed river sand is excellent.

Native epiphytes should be kept a little drier, especially the hot/colds but if you have a few *sarcochilus* then make sure they are kept moist all the time which is similar to *Paphiopedilum* culture as they do not have a bulb or cane that stores moisture over dry periods. *Sarcochilus* will also be in active growth with new roots showing but many will still continue to yellow and drop leaves as the stress of summer plays out the final chapter.

Take note that that the green root tips are great slug tucker and once they take out the tip the root will go dormant for quite a while. We don't need this to happen anytime, so care of any orchid root systems are vitally important. No roots means a sickly plant that has to use up whatever reserves it has in the back bulbs, canes or leaves. The most obvious signs of this is the shrivelling of either the bulbs or the leaves.

## **Culture notes for June (cont.)**

Those that are in spike or have new soft growths should be offered some additional protection if we get an extended wet spell coupled with those grey days when the sun don't shine.

Paphiopedilums will also start flowering in good numbers from now, especially the standards. Feeding is weak and fortnightly. Water must be kept away from the new flower spikes. If you do get some water in the top leaf axils then place a bit of tissue in the axils to take the water away. A blow through a drinking straw is just as effective. Don't move them around either once the flower spike moves clear of the foliage other wise they do distort like most orchids in the same boat.

With so many plants commencing their flowering season we see a steady increase in staking for presentation. It is no point tying a flower spike into position 5 minutes before you put them in the car and take them to a show. Preparation and training show plants takes place much earlier than that and is very specific to the genera involved.

Any training, adjusting and tying should be kept to the warmer parts of the day. Try it when the plant is cold and brittle and you will only do it once! Try and keep the plant facing the same direction after staking as they will distort badly if moved away from their original position and start searching for the low and weak winter sun.

Watering too should be done mid morning to early afternoon. Water too early and the water in the hose is very cold and we also want all plants as dry as possible at night (for those under cover).

Feeding of your plants in active growth usually drops back by about half of what you would normally feed them this time of year and will apply for the next 3 months.

Winter will move a few more pests into the relative protection offered in our orchid houses so keep an eye out on bug prone plants both inside and outside. Some of the examples being green caterpillars in the baby's tears, aphids in the thistles and woolly bears in the flat weeds such as Salvation Jane and plantain. If numbers start building up on these plants then preventative measures should be undertaken to keep them away from our orchids. Observation is one of the key elements to succeeding in all facets of gardening, not just orchids.

With the end of June we once again see the days start to lengthen but it will be awhile before plants and humans alike will notice the difference to the length of the days. With July on our doorstep we enter the worst month with extended cold dark days and maybe lots of rain and wind. Spare a thought for your plants and offer them the best care you can. Many will be in spike, the result of a careful years care, why ruin all the good work now with a little neglect because it's cold to go outside and look after them.

Steve Howard
