

The South Coast Orchid Club of SA Inc.
Gazette

**September
2010**

PRESIDENT: Geoff Spear

PATRON: Sydney Monkhouse

AT A GLANCE

The next meeting of the South Coast Orchid Club will be held at 8pm on Wednesday 1st September 2010 at St. Bernadette's Church Hall, corner of Walsh Avenue and South Road, St. Marys. The Guest Speaker for the night will be Trevor Garard. His topic will be the Phalaenopsis.

BEGINNERS' CLASS: will be held before the main meeting. The presenter will talk on Australian Native Epiphytes. Please be in attendance in the Recreation Room 7.15pm for 7.20pm start.

DAYTIME CHAPTER: The next meeting to be held at Lou Kesting Hall, Dover Square, off Broadway, South Brighton on Thursday, 9th September 2010 at 2pm. Guest speaker: TBA

SOUTHERN REGIONAL GROUP: Please note change of date. The next meeting will be held on Sunday 12th September 2010 at 2.00pm in Carrickalinga House, 17-19 Torrens Street, Victor Harbor. The Guest Speaker will be Kevin Cattermole speaking on 'The Heat Conditions and How to Survive'.

2010 COMMITTEE

Executive Committee

President:	Geoffrey Spear

SOUTH COAST ORCHID CLUB SPRING SHOW: SUNDAY 19TH SEPTEMBER TO SATURDAY 25TH SEPTEMBER

JUDGING: Saturday 18th September 2010

Venue: Hamilton Secondary School, 815 Marion Road, Mitchell Park in the Basketball Stadium.

Gates open at 11.00a.m. Any members who are able to help set up the hall please contact Lucy.

PUT IN TIME – 11.30a.m. to 12.30a.m. Judging – 12.30p.m. sharp.

Afternoon tea – please bring a cake.

VENUE: Centro Arndale, 470 Torrens Road, Kilkenny, Sunday 19th September. Put In Time – 9.00a.m.

Please bring your plants on time, we only have an hour to finish the display. Prior arrangements will need to be made with Tony Fisher or Geoff Spear for them to bring your plants from Hamilton School.

TRADING TABLE PLANTS FOR CENTRO ARNDALE

Trading Table Set-up at 5.00pm Saturday. Members may bring plants then or anytime during the week. Show times are the Club's bread and butter. Please bring along any plants you have for sale.

SPRING SHOW TIME

Let's make this a spectacular Show. The Committee needs assistance from members please ie

1. Volunteers to help on Trading Table
2. Ask Dorothy for swing tickets and selling sheets
3. Flowering orchid plants for display, prepared in show condition, clean pots.
Please do not water plants on the day you put in the Show, the day before is better.
Committee will look after your plants' needs while in the Show.
4. Trading Table plants, in good condition and clean pots.
You may bring in plants not in flower but please include a photo of bloom.
5. Most important Committee will ring member if for any reason they feel your plants may be starting to show stress.
6. Remember you must be a financial member to show your plants.

SHOW DETAILS FOR MAIN GROUP AND SOUTHERN REGIONAL GROUP

The **Spring Show** will be held at Centro Arndale Shopping Centre, 470 Torrens Road, Kilkenny from the following dates:

Sunday 19 th September	11.00a.m. to 5.00p.m.
Monday 20 th to Saturday 25 th September	Shopping Hours

The **Winter Show** for the **Southern Regional Group** will be held at the RSL Hall, Coral Street, Victor Harbor from the following dates:

Thursday 26 th August	12.00p.m. to 5.00p.m.
Friday 27 th to Saturday 28 th August	10.00a.m. to 5.00p.m.
Sunday 29 th August	10.00a.m. to 3.30p.m.

SHOWING YOUR ORCHIDS

Members who wish to show plants must be financial. Your number and name of plant must be on appropriate coloured labels: 2nd Division Yellow, 1st Division Buff, Open Division Green.

PUBLIC LIABILITY

Under insurance guideline all members and Committee attending any function or meeting held by the Club must now sign an attendance book by name and signature.

LUCKY NAME BADGE

Make sure you wear your name badge you may win a prize!

BIRTHDAY DRAW

Put your name in the Birthday Book. You may win a prize!

BIRTHDAY GREETINGS FOR SEPTEMBER

The Committee wishes the following members a very 'Happy Birthday' :

Marie Bravery, Anne Briggs, Colin Campbell, Dorothy Carassai, Peter Flavel, Val Garret, Marie Lutz, Joan McMahon, Rod McRedmond, Eileen Pinnock, Thelma Reglar, John Robinson, Richard Wilson and Sue Zerbe

BEGINNERS GROUP PROGRAMME MAIN MEETING 2010

<u>DATE</u>	<u>SPEAKER</u>	<u>SUBJECT</u>
September 1 st	TBA	Australian Native Epiphytes
October 6 th	Kevin Western	Australian Native Cymbidiums
November 3 rd	TBA	Australian Native Terrestrials

ORCHID CALENDAR FOR 2010

26 th to 29 th August	Southern Regional Group Show, R.S.L. Hall, Coral Street, Victor Harbor.
Sunday 19 th to Saturday 25 th Sep.	Spring Show at Centro Arndale, 470 Torrens Road, Kilkenny. Judging Saturday 18 th September.
Sunday 10 th October	Plant House Visit. Fisher Family, Valley Orchids, Jane and Don Higgs, Myponga.

PLEASE NOTE

August Main Meeting results and Winter Show results were not available at the time of printing and will be sent separately when available.

BUS TRIP 1st AUGUST 2010

We experienced an excellent social event organised by the Committee.

The coach left on time and arrived at Moss and Rosemary Bray's Nursery in time for a delicious morning tea. As usual, their Cymbidium Nursery was a delight to explore, with thousands of plants in flower and it was difficult to decide on what plants we would take home. Heather chose a gorgeous large pink and I settled on a red intermediate.

When all plants were stored on board, we left for the Virginia Nursery. We had heard that it was an outstanding nursery but it far exceeded our expectations. After an hour or so of walking the corridors, we settled on lunch in their cafeteria to give our feet a rest. Most members couldn't resist a few of the bargains on offer and eventually almost filled the luggage compartment of the coach.

Our final destination was Noel Oliver's nursery and I was amazed that some members were still financial! It is an excellent nursery with many different genera available. Fortunately, our retirement home has limited space in our shade house but Heather still found a small succulent for the kitchen window sill. The big problem now was what plants had to go to make room for our purchases.

Our thanks to the Committee for a well organised event.

Ralph Lucas

PRESIDENT'S MESSAGE

Congratulations to you all on a wonderful Winter Show. The support we received from members was excellent and it certainly shows that helping each other can achieve wonderful results. Champion of the Show went to Denis and Glenys Cook. Congratulations to you both.

We certainly had a grand display which was a credit to all who entered plants. The Trading Table was a great success.

We did not have as many members join us on the Bus Trip, but those that were there, had a great time. We were surprised by just how large the Virginia Nursery is. Thank you to Rosemary, Moss and Noel, who once again made us very welcome. A lot of plants again found new homes.

Yesterday, the Southern Regional Group had their Workshop. Everyone who attended needed a medal. I have never been so cold in all my life!

Thank you to Elsie and Reg who once again hosted the Workshop and made sure we all had a great time.

Lucy and I returned from Perth late Tuesday night. We have been used to temperatures in the low 20's. The Conference was held for the first time in Perth. They all did a very good job. Twenty-seven South Australians went over for the Conference. The Cymbidium Club organized the trip, which all went very smoothly. The Club organized a bus to take us all to the tourist places to have a look, in our free time. Perth is certainly a beautiful city.

One more Show to go, Arndale. This is our large Show. Members try your hardest to give us the support you gave us for the last Show and we will have had a phenomenal year. I was talking to Centre Management just before we went away, and Deb told me she is having phone calls already, waiting for our return next year.

See you all next month.

Good growing and showing,
Geoff.

DAYTIME CHAPTER REPORT

Hi Everyone,

This afternoon's Chapter was a very informative one packed with heaps of growing hints about all genera of orchids.

Our guest speaker, Mr John Gay, certainly packed his van with so many orchids that it was fantastic to see. Thanks John so much for making the effort. The members were really impressed by all the information given to them. I am sure that everyone learnt something else that they could try at home to help to improve their cultivation of their orchids. If everyone learnt something new, that's great, mission accomplished. Thanks again John for a job well done. Also those cyclamen plants were great, a good idea bringing them as well.

Apologies today from Mr. Peter and Mrs. Geraldine Flavel and Mrs. Marie Bravery. Hope to see you all again soon.

We welcomed two new members today. Mrs. Pauline and Mr. Bob McCulloch are growers of some beautiful orchids and are very keen to learn more, so today's talk was timed nicely for them. A big welcome to you both.

Our Winter Show at Castle Plaza was a great success in a very nice location. We have been invited to come back next year so that is great news.

Our bus trip was also another great day for all that were able to attend. The Virginia Nursery was a very large place and the items for sale were amazing. They even had a pet shop with small animals plus heaps of plants and plant requirements. The trip to Moss Bray's and Noel Oliver's was also very well received by the members.

Mrs Eva Soar was the lucky winner of the lovely quilted bag, donated to the club by Mrs. Shirley Gordon to raffle. Shirley made and stitched this herself, so thankyou Shirley and thanks also to those who participated in this fundraising venture.

Mr. John Gay did our plant commentary. Being a judge in our club he did a very professional job whilst also giving out more hints for better growing and showing. Thanks again John.

(cont.)

Daytime Chapter (cont.)

Our display table of members' plants for showing was very well stocked today. There were lots of lovely plants to see. Mr. Graham and Mrs. Barbara Randall's Cymbidium *Lotte Hobbie*, a lovely plant with two very dark red flower spikes (very similar to the red of *Ruby Eyes Red Baron*) was voted best in display. Congratulations to you both, well done.

Thanks also to the other members who bought in their lovely plants for us all to see. A big thankyou to those who bought in extra plants to add to our Raffle, this was very much appreciated.

Thanks also to Audry, your help in the kitchen is invaluable.

The meeting was closed, a cuppa the next item on the agenda.

Thanking all in attendance

Bye, Dorothy

8277-1793

SOUTHERN REGIONAL GROUP

Please Note: Change of September meeting date to 12SEP10

Thank you to Noel for being guest speaker at the last meeting. He, as always, gave a very interesting talk on his beloved Australian Natives. Noel as most of you know is a very busy person. Always in demand at most Clubs, for judging, guest speaker at meetings and he also donates a lot of his time to Country Clubs passing on his knowledge, what would we do without him at the Southern Regional Group!

Your Guest speaker for October is no stranger to your group, Trevor Jacobs and his wife Margaret, always there to help and pass on knowledge.

Thank you to all the members who gave their time to speak at your workshop, they certainly gave you a lot of knowledge to take home and put into growing your plants even more successfully.

Geoff, Dorothy and I will be at Victor Harbor by 9.00a.m. to help organize your Show. Trevor has put a lot of his time into organizing the advertising, Noel has spoken on the radio, and having the same great venue certainly is a plus.

Southern Regional Group August Results List - Second Division**Australian native species**

1st *PTST Curta* grown by Reg Clifford and Family

SCALE & MEALYBUG

We have been battling with these 'monsters' for many years now and did not really understand anything about them. Sometimes you wonder where they come from. How did they get on our plants? Why didn't we see them before they did so much damage and look at those leaves with their yellow spots and brown marks? These marks can also be confused with virus. Someone said the ants bring them. I do not think so because we haven't got any ants in the Glasshouse and the scale is still there so we decided to do some research and this is what was discovered.

Scale and mealy bug including aphids are from the same mob called Homoptera, now that a turn up, you would not think that a scale would have anything to do with one of them 'Woolly' things now would you. These scale of which there are many types can be classed into the three categories we mainly see in our growing area and they are the soft scale of which we see 'heaps' of them, then we have the armoured scale of which we do not often see them very often and of course last and certainly not least our old enemy the mealy bug or you might call them 'Woolly Blokes'?

There are thousands of scale insects around the world and most of them have a very destructive nature causing all sorts of damage and this of course affects the sale of plants, fruit and vegetables and of course make our orchid plants far from being in Show-bench condition. Most scale are sedentary that is they are just sitting and do not move and are very difficult to control particularly with sprays and you find that most of these pests have a natural talent for survival. The armoured scale is very hard to see and is just a black dot but we do not see him that often but is occasionally on imported plants from interstate. Firstly, particularly the adults attach themselves to the host and are equipped with a protective coating made from the waxy secretion they produce when feeding and this forms a waxy cover over 'him' or is it 'her' and of course with the 'Woolly Bloke' it is a dense mat of a waxy cotton wool like appearing cover. These coverings protect the 'nasties' hiding below under their cover from the man who approaches in what appears to be a person in a deep sea diving suit with a knap sack full of poisonous spray on his back from harming them.

Sometimes you need to look around your garden or even over the fence. A lot of these pests are out there in the garden on the trees and shrubs and even over the fence next door or in the adjacent parklands. Adult males actually have wings and they come flying and marching over to

your place at certain times of the year. The immature smaller ones are crawlers and are very mobile and spread more slowly. So do not ever think that you have got rid of them all in your growing area because they just keep on coming back. You can import them from the trading table, interstate from your favourite nursery or even a division or present of a plant given to you by a well-meaning orchid friend.

They take up residence on 'your' leaves everywhere and particularly on a weakened or stressed plant. Heavy spraying, regularly and often must be done to penetrate their fortresses and to smother them but care needs to be taken so as not to smother the plant also and kill it at the same time.

When they camp on the underside of the leaves where you do not see or discover them they insert their straw like mouth-part into the cells of the leaf and suck out the sap or plant's juices and go unnoticed until you see those yellow sunken spots and signs of the damage on the top side of the leaf. The soft scale starts of as a light white/green spot and as it matures appears as a bark coloured bump and can be odd ones here and there or quite densely populated particularly in the fold of a leaf or the new green leaf bracts down around the pseudobulb or anywhere else for that matter where they have some protection. The ordinary mealy bug, whitish in colour produces cottony egg

masses and the two tailed one reproduce by giving birth to live young ones making eggs of the others obsolete.

There are several commercially made controls for both scale and mealy bug. We find Confidor the most successful product for mealy bug and about 10% spray oil and water with 2mm of Malathion in a 500ml. hand sprayer the best for scale but you need to keep at it. Some growers have success with systemic products where the bugs get killed when they feed on the plants but these chemicals are dangerous to spray with. You sometimes think that you have got on top of them and then you locate a few more, it is a matter of being alert all the time and pick up each individual plant and inspect it carefully, they always seem to be where the plant is in low air movement.

Once the colony becomes large enough you will notice the formation of the black sooty mould, which grows on the sugary excrement or honeydew that is produced, this is usually found on the leaf or leaves underneath the pests where it has 'dripped' down and this is the material that the sugar feeding ants are attracted to on those warm sunny days in spring and summer. You can also get root mealy bug which is more difficult to notice as they are hiding just under the bark in the root ball mass. Pull some bark away from the base of a Cattleya and you may find them under or around the rhizome of the plant and particularly those leaves that are close to the wall or in the corner of the growing area. Over crowding of your plants is providing them with the right conditions to operate and expand.

It is fast becoming more popular to introduce predatory insects and a lot of large nurseries have now adopted this practice but these can be expensive for the novice grower. The 'Lady Bug' we used to see a lot of in our gardens years ago loves these pests but unfortunately we have thinned these harmless insects out with garden sprays and poisons on fruit trees, roses etc.

Hope this helps you to understand these fellows a little better. It certainly helped us, keep at them and don't give up.

David & Pat Harmer.

Plant Commentary, August 2010

Flower of First Division and Flower of the Night: Cym, (Minniken x Blazing Fury) benched by Murray Baulderstone. A single upright inflorescence of 16 flowers evenly and well displayed around the stem. The flowers were 85mm wide by 70mm tall with even medium pink sepals and petals with a darker mid-vein and a fine cream margin around the edges. The mid-lobe of the labellum was strongly striped and spotted deep maroon on a pinkish cream base, deep pink side-lobes and column and a cream pollen cap.

Flower of Second Division: Cym. (Gidget x Rotarua) benched by Vickey Cooper. Two inflorescences, one with 12 open flowers, the other with 9 open flowers and 1 bud. The flowers were 65mm to 70mm across and 60mm tall. Reddish brown sepals and petals with a fine cream edging. The labellum heavily marked around the edge of the mid-lobe with deep maroon to red spotting and shading on the side lobes.

Flower of First Division: Rth.(Blc.) Great Taiwan 'Orange' benched by Beryl and Richard Wilson. Three inflorescences each carrying 3 flowers 105mm wide and 100mm tall. All segments yellow, sepals deep butter yellow, the petals shading to cream towards the base. Edges of the petals and labellum were heavily frilled and the labellum was a little darker with orange tones. The column was pale yellow with a cream pollen cap.

2010 WINTER SHOW COMMENTARY

Grand Champion and Champion of Open Division: *Cym. Ruby Valley 'Clare'* shown by Denis and Glenys Cook. The plant had three upright inflorescences with 16, 13 and 13 flowers. Flowers were 85-88mm wide by 80mm tall, the sepals and petals were deep pink/red with a very fine line of pale pink around their edges. The broad labellum with heavy deep red barring across the mid-lobe and the side lobes were spotted with the same deep red.

Champion of First Division: *Ptst. pendunculata* shown by William Clark. This species was grown in a bowl about 24cm in diameter and was a mass of plants with the leaves form an estimated 100 or more tubers totally covering the potting medium. The stems were upright and displayed the small flowers, typical for the species, very well. Many of the other tubers were also sending up buds on stems of various lengths and tended to be more to the edge of the bowl.

Champion of Second Division: *Paph. (insigne sanderiae x gaultianum album)* shown by Anne and Colin Campbell. There were two single flowered inflorescences produced by the well green medium sized plant with glossy foliage. The flowers were 125mm across and 120 mm tall, the white sepals were striped with light green veining and light brown shading towards their bases. Petals were also white with light green shading, deeper green venation and a distinctive light brown mid-vein. There were short hairs along both upper and lower edges and fine brown spotting mainly on the upper edges. The pouch was green with brown shading towards the opening.
